Skills

Languages: Python, JavaScript, C++, SQL, HTML/CSS

Frameworks: React.js, Node.js, Express.js, Bootstrap, REST APIs

Developer Tools: Git, GitHub, Cursor AI, MongoDB Atlas, Vercel, Render, VS Code

Libraries: NumPy, Pandas

Education

Amrita Vishwa Vidyapeetham, Amaravati

Aug 2023 – Present

Bachelor of Technology (CSE)

- Pursuing a Bachelor of Technology in Computer Science and Engineering.
- Actively learning modern web development, machine learning concepts, and related essential libraries through coursework, projects, and practical assignments.

Projects

SocialFlow - AI Auto Posting SaaS MVP 🔗 Repo

May 2026 – Present

- Developing a cloud-hosted AI Auto-Posting SaaS using MERN, Docker, private **n8n** workflow orchestration, OAuth integrations, and AI-driven content generation workflows.
- Built scalable cloud infrastructure with **Oracle VPS**, **Cloudflare**, **MongoDB Atlas**, **nginx** reverse proxy, secure SSH tunneling, and multimodal media upload support.

AI-Powered Mock Interview Platform Live 🔗 🔗 Repo

May 2026

- Built a full-stack AI-powered mock interview platform using the **MERN stack** with **JWT-based authentication** and cloud deployment through **Render**, **Vercel**, and **MongoDB Atlas**.
- Integrated **3 external AI APIs** to simulate intelligent interview interactions and real-time AI-driven responses.

MCP-Powered Learning Path Generator 🔗 Repo

Aug 2025

- Built an AI application using **MCP** and **Google Gemini LLM** to generate personalized learning roadmaps by orchestrating YouTube and document creation tools via Pipedream MCP servers.
- Implemented a **Streamlit UI** for interactive goal input and real-time AI-powered roadmap generation.

Certificates

Build Your Own Dynamic Web Application

- Developed a dynamic, data-driven web application using HTML, CSS, JavaScript, and APIs, implementing DOM manipulation and event handling to deliver interactive, real-time user experiences.

Programming Foundations with Python

- Completed Programming Foundations with Python course focused on core programming concepts. Gained hands-on experience with control flow, data structures, OOP, and exception handling.

Introduction To Databases

- Completed with hands-on SQL and relational database training. Gained skills in table creation, querying, joins, keys, and data manipulation using SQLite.

Build Your Own Responsive Website

- Built responsive websites for large and extra-large screens using HTML, CSS, and Bootstrap. Applied Flexbox, Grid, and Bootstrap utilities to design scalable, consistent user interfaces.
